AUSTRALIAN MADE JETTERS BY THE ORIGINAL 

VIPER SERIES WATER JETTERS

STAND OUT FROM THE CROWD & GET THE JOB DONE FAST

Introducing the SEWERJETT Viper Series water jetters. Vipers are sleek, compact and engineered for value, with a powerful bite to destroy any blockage. An Australian-made innovation built tough for local conditions.

Available as a trolley jetter, or fitted to your trailer or ute, and packed with accessories, choose from two models.

The Viper A is a trolley jetter that's easy to manoeuvre and perfect for lighter commercial or domestic work. It's a Class A water jetter so no special training is required.

If you're after a heavier duty commercial jetter that can be fitted to your trailer or ute, the compact Viper X is a powerful Class B Jetter that has the venom you need to get the job done in style.

Ask for the Viper at your local plumbing supplies store, or give us a call on 1800 816 830 for details and your nearest stockist.
